

Brasseys annual Volume 1906 the armed forces year-book

By Thomas Allnutt Brassey

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 118 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: . . . will have mastered the elements of the differential and integral calculus; all will have done a fair amount of analytical geometry, trigonometry, and spherical trigonometry, and, of course, algebra will be well taught. The watertanks are being employed for instruction in quantitative measurements of metacentric height and curves of buoyancy. The cadets soon realise that these are but long names for comparatively simple notions, and it is already observed that so keen is their interest in physics that they are making strenuous efforts to pursue their mathematics so as to follow up the enticing track which is there revealed to them. It is unnecessary to describe the further training of officers who specialise as lieutenants (E). But it is nothing less than a gratuitous assumption, supported by no shadow of evidence or probability, that engineering efficiency will be impaired under these men, or that breakdowns are...
