The animals living in the forest are surprised when a mountain suddenly explodes, covering the land in gritty warm ash and rocks that make it unlivable for many plants and animals. Gopher survives in his underground burrow and gets to work, digging through the ash, and mixing it into the soil below. He works hard every day, and slowly some of the plants and animals return to the area. Will the forest ever be the same? Scientists spent years observing how life returned to the mountain following the eruption of Mount St. Helens on May 18, 1980. This fictionalized story is based on their surprising observations of how life returns to an area that has been totally changed or destroyed. 2013 NSTA: Outstanding Science Trade Books 4-6 pg For Creative Minds educational section in the back 40-60 pg cross-curricular Teaching Activities and 3 Interactive Quizzes available free on the books homepage eBooks with Auto-Flip, Auto-Read and selectable English and Spanish text and audio This item ships from multiple locations.
