Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .No indication of increase from the minimum were observed. But, in a few days, if I mistake not, the change will begin. In three or four weeks probably it may be seen with an opera glass, and possibly by the end of December the unaided eye will readily see that the dark space is no longer vacant. Thence on through January to about the middle of February it will continue to brighten on the deeply interested observer s gaze. At this appearance there will still be time before twilight interferes to observe a part of its decline. Mira to me is always of a beautiful rich red color, even when seen at the minimum with a small telescope. Her companion seems decidedly smaller or fainter. F. BRADBURY. The Variable Stars Mira and R Leonis.--In reference to the article on Mira there was one fluctuation which Mr....
