New Book. Hayward and Ryland s Marine Fauna of the British
Isles and North-West Europe has become a classic in the
marine reference literature. The same editors have now
prepared a shorter version suitable for individual purchase
and field use. Rapid and easy identification of all but the rarest
of the marine animals found on the sea shores and shallow
sublittoral zones of north-west Europe is made possible by the
provision of simple dichotomous keys, individual descriptions,
and high quality line and stipple drawings. The occurrence and
distribution is given for each species, and reference provided to
the specialist literature which will facilitate more detailed study
and coverage of the additional, rare species not covered in the
book. The book is especially suited to student and amateur use,
allowing identification of the majority of marine animals. No
other guide is available at this level.
