Linear relationship between mathematical objects that are expressed in a form containing an unknown amount of  $n$  is called an equation of linear equations. First. the correct learning linear algebra useless error awareness. Not limited to knowledge and learning methods. more important is to understand the implication of deep thought. and thus maintaining the status quo. The meaning of linear algebra with the development of mathematics continues to expand. its ideas and methods have penetrated into many branches of mathematics. therefore. the author not only to study the relationship between a single variable. but also to further study the relationship between multiple variables (The introduction of the vector to form a vector space concept. all linear problems can be discussed vector space point of view. therefore. the vector space and linear transformation. and the matrix associated with this theory constitutes the center of the linear algebra content). a variety of practical problems in most cases can be linearized.
