

Finance and Economics Discussion Series: Inside the Black Box: What Explains Differences in the Efficiencies of Financial Institutions

By Allen N. Berger

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 62 pages. Dimensions: 9.5in. x 7.4in. x 0.3in. Over the past several years, substantial research effort has gone into measuring the efficiency of financial institutions. Many studies have found that inefficiencies are quite large, on the order of 20 percent or more of total banking industry costs and about half of the industry's potential profits. There is no consensus on the sources of the differences in measured efficiency. This paper examines several possible sources, including differences in efficiency concept, measurement method, and a number of bank, market, and regulatory characteristics. We review the extant literature and provide new evidence using data on U. S. banks over the period 1990-95. This item ships from La Vergne, TN. Paperback.
